Gene Expression Profiling of Non-Communicable 2019

Diseases in Nigeria. (P.I). 54 Gene Heritage Study Grant.

Current Grant Funding

- a. **Title** :54Gene Heritage study
- b. **Funder** ; Dr.Abasi Ene-Obong
- c. **Brief Summary**

54gene is a research, services and development company located in Nigeria and the United States. The company was founded in 2019 by Dr Abasi Ene-Obong to improve our understanding of the world's most genetically diverse population. 54gene utilises human genetic data from diverse African populations, to improve the development, availability and efficacy of medical products that will prove beneficial to Africans and the wider global population. NCD-GHS Consortium is a partnership of Nigerian geneticists from 54gene, Nigeria Institute of Medical Research (NIMR), the National Biotechnology Development Agency's Centre for Genomics Research and Innovation (NABDA-CGRI), London School of Hygiene and Tropical Medicine (LSHTM). The consortium will study cardio-metabolic diseases, neurodegenerative diseases, cancers that are more prevalent on the African continent, endocrine disorders and sickle cell disease.
